

## **SHEET FOLDING MACHINE**

**MODELS-1400mm, 2150mm, 2650mm, 3150mm**

**Universal manual bending machines "MB"** have removable upper bar and it can be change to another bars with different forms and options. So you can install segmented bar and it lets you to use our bending machine as segmented folder to make boxes, facade cassettes etc. Or you can put bar for making corrugated panels to produce corrugated sheets for fences, roofs etc. With standard bar you can produce standard roofing and ventilation elements with our machine. So it lets you to use machine in different ways and to save money from purchasing additional equipment.
